Private Security	: Yes

Property Description:

Enter into your own personal world of glamour,sophistication and style on this beachfront residential project on greater Phuket.

Sava is spread along 200 metres of some of the most beautiful beachfront in Thailand. Located at the south end of Natai Beach, Sava is an exclusive development funded by Avila Capital Ltd, a developer in Asian real estate with offices in Hong Kong and Singapore.

Architect Adrian McCarroll of Original Vision was awarded the opportunity to design distinctive homes on the expansive seafront site. Original Vision has been pioneering new design concepts in tropical architecture. Mr. McCarroll is well known for his stunning villa designs at Samsara, one of Phuket's first exclusive boutique developments overlooking Patong Bay. With his clever use of low ceilings to give a sense of intimacy mixed with cathedral or vaulted ceilings which provide a sense of grandeur, his designs allow for a variety of feelings within the home.

I design a home so there is the potential for a big party but also the pleasure of being alone. At Sava, I've designed the villas so they celebrate the proximity to the beautiful beach, the big pools and expansive gardens, all of which feel as though they flow into the home, says Mr. McCarroll.

The Sava project features five ocean front villas of 684 square metres that face directly onto Natai Beach. Each has six bedrooms and an expansive 6.3 metre by 25.5 metre swimming pool which is designed to connect outdoor with indoor living areas. These homes are meant for extended families or friends who would enjoy this opulent beachfront estate.

Sava will be Greater Phuket's most sophisticated development with smart technology design. AVC Phuket, a local leader in innovative lighting and technology will install a user friendly VANTAGE system whereby a push of a button will set lighting, open and close curtains and create the perfect mood for any occasion.

Avila Capital Ltd. recognizes the demand for superior homes in beautiful locations based on their significant research and experience. The Sava project on Natai Beach promises to be the region's most desirable addresses.

Only two oceanfront villas are available as of March 2010
